PRESENTATION

I am a Junior Full Stack Web Developer with one (1) year work experience.

Over the past months, I have developed Simple Restful APIs with Node, Express and Mongo DB as a backend for my projects.

I developed a Login and Registration Authentication for my Web Application and I also developed responsive websites.

I used bootstrap4 and jQuery very often so that the turnaround of my projects can be done quickly; I also use GIT and NPM very often when developing projects.

WORKING EXPERIENCE

- I developed a Full Stack Note Application with Register and Login Authentication. This Application only allow registered users to Creates, Reads, and Updates and Deletes a Note.
- I developed a Book Management Application that Creates, Reads, Updates and Deletes a book from a Book Database.
- I also developed a Fetch Gallery Application that displays categories of Images in a special order from the Flickr API.
- 2012 – 2016: I Worked as a Computer Hardware Engineer. Verso Technology Company - Liberia Inc.
 - My tasks were to maintained, updated and repair the company's Computers System.
